EDUCATION

Dr. A. P. J. Abdul Kalam Technical University

IIMT College of Engineering

Bachelor of Technology : Computer Science (AI); CGPA: 8.61

GATE (CSE) Qualified

Greater Noida, U.P, India

September 2022 – June 2026

2026

SKILLS SUMMARY

- Languages:** Python, JavaScript, TypeScript, Java, C/C++
- Machine Learning & NLP:** Scikit-learn, TensorFlow (Deep Learning), NumPy, Pandas, Matplotlib
- DevOps & Cloud:** AWS, Docker, Git, GitHub Actions, CI/CD pipelines
- Databases:** PostgreSQL, MySQL, MongoDB
- Web Development:** Flask, FastAPI, React.js, Next.js, Node.js
- Operating Systems:** Linux (Ubuntu, ROS, Raspberry Pi OS), macOS, Windows
- Soft Skills:** Teamwork, Project Management, Communication, Decision-Making

PROFESSIONAL EXPERIENCE

Software Development Engineer | [MakeOver India Probuild](#) | full-time (Onsite)

June 2025 – Present

- Led a **5-member development team** of [MakeOver India Probuild](#), a comprehensive beauty and salon service platform (**available on App Store & Google Play**), to deliver **4 software applications** (client, business, admin dashboard, and community platforms) and **managed interns** while driving backend and frontend feature execution end-to-end.
- Designed and implemented end-to-end **payment and wallet infrastructure** using **Razorpay**, including payment processing, refunds, payouts, transaction reconciliation, webhook automation, loyalty credits, and digital wallet management.
- Leveraged **AWS S3, CloudFront, CloudWatch, SNS, KMS, Redis, WebSockets**, and **AWS Lambda** to build scalable, secure, and real-time backend services with low-latency performance, while designing automated **CI/CD pipelines** with **Docker** and **GitHub Actions** that reduced deployment time by 65%.

Open Source Contributor | [GSSOC'24 & GSSOC'25](#) | part-time (Remote)

2024 – 2025

- Ranked #3** out of **40,000 participants** in a competitive open-source program (GSSOC'24).
- Mentored **50+ developers** as project **admin** (GSSOC'25), and drove the **complete project roadmap** including architecture, code reviews (**100+ PRs**), and release management, **70+ repository forks**.
- Successfully submitted **200+ Pull Requests (PRs)** as **contributor**, ensuring high code quality and adherence to project standards.
- Maintained a **38-day contribution streak**, demonstrating dedication, problem-solving skills, and collaboration with diverse teams.

PROJECTS

[NAMI](#) (Navigational Autonomous Mapping Intelligence) | github.com/IkkiOcean/NAMI

October 2025 – May 2026

- Description:** Developed an **autonomous indoor navigation and logistics robot** capable of real-time mapping, localization, path planning, and obstacle avoidance in unknown environments without external navigation infrastructure.
- Features & Tech Stack:** Built using **Python, ROS Humble, Ubuntu, Raspberry Pi 4B, YDLIDAR X2, MPU-6050 IMU**, wheel encoders, **SLAM Toolbox**, **A* path planning**, and **Dynamic Window Approach (DWA)** for autonomous exploration and navigation.

[Jeevika](#) | github.com/IkkiOcean/Jeevika

February 2024 – July 2025

- Description:** AI-integrated **automatic drug dispenser system** that connects doctors, patients, and pharmacies. Enables prescription generation, vitals scanning, and medicine dispensing via QR code and **Cashfree payment gateway**.
- Features & Tech Stack:** Combines **React.js, Flask, AWS S3, Raspberry Pi, Linux, Arduino**, IIOT Sensors, and Gemini APIs to support doctor-patient integration, SMS-based prescription delivery, and **secure AWS prescription storage**.

[AgroTech AI](#) | github.com/IkkiOcean/AgroTech-AI

October 2024 – November 2024

- Description:** Open-source, web-based platform providing **machine learning solutions for agriculture**, including crop management, soil health assessment, pest control, and yield prediction.
- Tech Stack:** React, Tailwind, Flask, Node.js, Express, MongoDB, Python, Machine Learning, Deep Learning.

[SQL AI RAG Application](#) | github.com/IkkiOcean/SQL-AI

September 2024

- Description:** AI-powered tool that translates **natural language into SQL queries**, enabling **100% code-free interaction** with databases for non-technical users.
- Features & Tech Stack:** Built using **Flask, React.js, LangChain, Gemini Pro**, and **SQLite**, handling queries with **sub-500ms latency** for seamless real-time execution.

CERTIFICATES

- [Unsupervised Learning, Recommenders, Reinforcement Learning \(Stanford Online\)](#)
- [Advanced Learning Algorithms \(Stanford Online, DeepLearning.AI\)](#)
- [Supervised Machine Learning: Regression and Classification \(Stanford Online\)](#)

November 2024

October 2024
